

## ACC Opens New Office in Rockville, Maryland

Neptune, NJ and Rockville, MD (February 2011) - Automated Control Concepts, Inc (ACC), a systems integrator specializing in process and information solutions, is pleased to announce the opening of a new office in Rockville Maryland.

ACC has implemented several significant automation and electronic data collection projects for local biotech and utility customers. One recently completed project resulted in ACC's customer receiving a Facility of the Year Award from the International Society for Pharmaceutical Engineering (ISPE).

“Our new office will allow us to enhance support to our existing customer base in the area, as well as to better market our services to other firms” states Michael Blechman, President of ACC. “In addition, the presence of so many life science firms, the availability of a highly skilled workforce, and our previous successes made this area very attractive to us”.

ACC's office is located in the Shady Grove Innovation Center - part of the Montgomery County Business Innovation Network. ACC's Rockville office will be home base for ACC's operations in Maryland, Delaware, and Northern Virginia.

---

Established in 1983, ACC helps businesses improve the efficiency, quality and compliance of their manufacturing operations through the strategic use of technology. ACC delivers solutions to manufacturers in a wide variety of industries, including Life Sciences, Consumer Goods, Water and Utility.
