

DYNASONICS RECEIVES IQ AWARD FOR INNOVATION

BizTimes Milwaukee announces Dynasonics TFX Ultra as winner of 2010 Innovation Quotient Award

June 14, 2010—The Dynasonics Division of Racine Federated Inc. and its new TFX Ultra product were recognized by BizTimes Milwaukee as a winner of the 2010 IQ (Innovation Quotient) Award. IQ Awards are presented to Wisconsin-based companies that generate innovative products, services or processes. They must have a presence in Southeastern Wisconsin, including Milwaukee, Waukesha, Ozaukee, Washington, Sheboygan, Racine, Walworth or Kenosha Counties.

The advanced TFX Ultra is an ultrasonic flow and energy meter that clamps on the outside of existing pipes without contacting liquids. There is no need to shut down the process for installation or maintenance, therefore the TFX Ultra can be installed and fully operational in minutes. With no moving parts, there is no mechanical wear – no repair kits or replacement parts are ever needed. The TFX Ultra provides accurate and repeatable flow measurement readings for full pipe liquids on nearly all pipe materials sizes ½" and larger.

Applications include cooling lines, raw sewage flows, water distribution and other processes where system shutdown is impossible. The TFX Ultra is also available as an energy flow meter measuring energy usage in BTUs or Tons, and is ideal for retrofit, chilled water and other HVAC applications.

Dynasonics was featured in an edition of BizTimes Milwaukee and was also honored at the sixth annual BizTech Conference & Expo held at Wisconsin State Fair Park on April 29th, 2010.

About Dynasonics

Dynasonics is a Racine Flow Meter Group brand name and manufactures ultrasonic clamp-on flow meters. The Racine Flow Meter Group is part of Racine Federated Inc., a private corporation celebrating over thirty-five years of continuous operation in Racine, Wis., U.S. Racine Flow Meter Group manufactures turbine, variable area, hydraulic testing, differential pressure, vortex shedding and ultrasonic flow measurement products. Brand names include Blancett, Dynasonics, Flo-tech, Hedland, Preso and Racine Vortex. The Racine Flow Meter Group serves industrial, oil & gas, municipal, irrigation and energy management markets worldwide.
