

FOR IMMEDIATE RELEASE

**Concept Systems Inc. Attains Premier Integrator Level Status
Experts in Ignition by Inductive Automation™**

ALBANY, OR - August 23, 2011 - Concept Systems Inc. announced today that it has reached Premier Integrator status, the highest level of expertise offered by Inductive Automation™, a software company headquartered in Sacramento, California. Ignition by Inductive Automation™ is an industrial application server with a versatile web and database-centric architecture that allows companies to create systems covering the full spectrum between HMI, SCADA and MES.

Concept Systems' success using Ignition to create powerful and dynamic HMI/SCADA portals and feature-rich MES applications for their clients has earned them a spot held by only six other companies. Recent growth in this area has allowed them to expand their Ignition integration team, with engineers who have successfully completed Inductive Automation Ignition training and certification.

Open to all qualified systems integrators, Inductive Automation's rigorous integrator program encourages companies to become experts in using their software. To qualify at the certified Premier level, the integrator must have experience implementing the software in successful projects, have one or more certified engineers on their team, and maintain a high level of involvement to continue to retain the Premier Integrator status.

"We are proud to join Inductive Automation as a Premier Integrator," said Michael Gurney, Co-CEO/VP Sales & Marketing at Concept Systems. "The Ignition software platform offers a unique mix of a web-based/database driven system and a flexible, cost effective licensing structure that gives us the ability to provide unparalleled value to our clients."

About Concept Systems Inc.

Founded in 1999 and based in Albany, Oregon with offices in Seattle, Washington, Denver, Colorado, and Charlotte, North Carolina, Concept Systems Inc. provides automation services by taking advantage of the latest in proven technologies. These technologies include: PLC and DCS based controls, motion control and vision inspection, database applications, and production asset management systems. Concept Systems serves clients in the following industries: Aerospace, Building Products, Food & Beverage, Recycling, Metals & Mining, Converting, Pulp & Paper and Hi-Tech Manufacturing.

Recognized as 2007 Integrator of the Year by Control Engineering magazine, Concept Systems is a CSIA (Control System Integrators Association) Certified Member. The company is also a certified Rockwell Automation Solution Provider, Siemens Solution Partner, and a UL 508A- and 698A-certified panel shop.
