

## **MatrikonOPC now offers industrial strength data connectivity for Q Series PLC**

**EDMONTON, ALBERTA. Mar. 30, 2010** – MatrikonOPC™ is pleased to announce the support for Q Series PLCs in the MatrikonOPC Server for Mitsubishi PLCs. For integrating with HMI, Historians, ERP and MES, the [MatrikonOPC Server for Mitsubishi PLCs](#) offers direct access to not only A series and FX Series PLCs, but also all Q series PLCs. This OPC Server removes the hassle of purchasing and programming additional proprietary methods of communication, enabling users to access their data quickly.

For Automotive, Plastics, Packaging Systems and IT Sectors, data transfer and interoperability between engineering systems are important factors to achieve optimal productivity and profitability. The [MatrikonOPC Server for Mitsubishi PLCs](#) bridges the data gaps and links the plant floor with the top floor using the power of OPC, making it easy for users to convert data into useful information to deliver on their production goals.

“MatrikonOPC is committed to providing the maximum value to their customers. We understand how important it is for our customer to broaden their connectivity options as well as increase their systems’ reliability and security. Our OPC Server for Mitsubishi PLCs was built with the goal to meet those needs,” said Sean Leonard, Matrikon’s Vice President of OPC products.
