To become a CSIA Certified member, a member company must pass an intensive audit process with stringent performance standards categories in nine categories: general management, financial management, project management, quality management, technical management, human resources management and marketing, business development and sales management.

Certified members are re-audited every three years and recertified if they meet current performance standards. The certification criteria is spelled out in *CSIA's Best Practices and Benchmarks*, the accepted roadmap for system integrators committed to delivering the level of quality, performance and long-term support their customers expect.

About CSIA: Founded in 1994, the Control System Integrators Association is a global organization dedicated to helping its member companies achieve their highest potential by setting the standards for business performance. To learn more, visit www.controlsyst.org.
